

C105 HL: The Prelaminated, Customizable, and Strong Adhesive Handle

The ideal solution for easy carrying and packaging that communicates.

Looking for an adhesive handle that is not only strong and reliable but also offers customization options to boost your brand? The **Alimac C105 HL** handle is the perfect choice.

Based on the solid C105 platform, the HL version is **prelaminated**. It allows you to add custom inserts and high-quality printing, combining function and marketing.

Why Choose C105 HL?

- **Proven Strength:** It keeps the high tensile strength (350 N/25 mm) and excellent adhesion (on PE and steel) of the basic model, ensuring a secure grip.
- **Comfort and Customization (Inserts):** Thanks to the prelamination, you can add inserts made of different materials (MOPP, Paper, PE/PP Foam) to make the grip more comfortable or to share promotional messages.
- **Brand Visibility (Printing):** Stand out on the shelf! We offer printing of your logo, slogan, or promotional graphics directly on the insert, using up to 6 colors.
- **Versatile Use:** Ideal for multi-packs, promotional packaging, boxes, and anywhere you need to combine easy carrying with visual communication.
- **Functional Design:** The clear adhesive tape ensures it applies discreetly, while the customizable insert grabs attention.
